

Cargo Nets are used for segregating loads in trucks and containers. They can also be used to secure the inside of container doors of loaded containers to prevent the load from falling on the un-loader causing harm.

Each net has 4 corner straps and cam buckle for quick and easy fitting and tensioning. A strong and durable close weave design helps contain a wide variety of cargo.

Cargo Net is not load rated or designed as primary load restraint.

Specifications

Cargo Net Dimensions: 2.2m x 2.2m

Cam Buckle Ties Dimensions: 1.5m

Material: Polyethylene

Package Size: 350mm x 150mm x 180mm

Weight: 850g
